

## Flipped Learning Learning Now

### Training Always

#### For the modern learner.

The modern learner is using technology to learn everything from how to fix a tire to how to seal a deal—and Salesforce training is no different. We offer the Flipped Learning approach—integrating short bursts of digital learning and knowledge challenges that are available at the learner’s fingertips, across devices. Always now.

### Engage Learners

#### Improve knowledge retention.

Flipped Learning utilizes elearning modules or short microlearning videos to prepare learners for a highly focused hands-on workshop style training session. This control over when and where in their schedule to engage in learning also provides time to reflect on the concepts, processes, and skill being covered.

### Flipped Learning

#### Optimize employee’s time.

Acquiring the concepts at their own pace, the learner is provided the opportunity to practice their new skills and collaborate with colleagues in a highly interactive workshop based on real world working scenarios under the guidance of a certified Salesforce instructor.

### Sneak Peek

#### See what we can do.

Contact your Client Advisor for a Sneak Peek.

Independent microlearning modules supported by tip sheets and mini-assessments or challenges

Web or classroom training focused on workshop with situation learning

Application and support through review of modules and tip sheets
