

# ProfitZoom Mobile

## Field Service Module

Are you using multiple software systems or relying on paper to schedule inspections, track field service and invoice jobs? Both of these processes leave too much room for human error and double data entry. What if you had one system that integrated all aspects of your business?

**ProfitZoom is the only application designed to give you a seamless workflow from the back office to the field and then directly to invoicing in one complete system.**

### Maximize Productivity

On-demand updates allow for field technicians to respond quickly to changes on the job. Automating paper processes and reducing human error improves office productivity. The improved workflow streamlines your operation so that resources can be allocated efficiently.

### Improve Cash Flow

With instant access to service order information, jobs can be invoiced immediately after job is completed; even from the field if you prefer!

### Intuitive Interface

Field technicians can easily navigate from screen to screen on their mobile devices. The user-friendly interface allows for mapping out the most efficient route, as well as easy tracking of parts used, time spent on the job and equipment inspected.

### Features

- Sleek interface
- Customizable settings
- Seamless integration between mobile and office
- Log definitive time spent on an inspection
- Track deficiencies
- View/edit notes for special instructions

**Call us today to find out how you can improve cash flow, productivity and profitability with ProfitZoom!**
