## Business Profit Management Program for the Fire Suppression Industry

ProfitZoom™ is the future of fire suppression profitability. Our unique program's user interface is so advanced; it's the only one of its kind. Never before has a program been designed specifically for fire suppression profitability that integrates everything from dispatching to inventory to job costing.

By integrating all areas of your fire suppression business and tracking your daily operations as they happen, you can easily make advanced adjustments to meet your goals and needs. The system also includes a Field Service Module so Field Technician activities can be tracked and synchronized with your corporate server automatically.

### SINGLE INTEGRATED SYSTEM

- Services
- Dispatching
- Mobile Synchronization
- Management Dashboard
- Centralized Financials
- Materials
- Jobs
- Labor
- Payroll

### INCREASE PROFITS

- Watching your daily business operations in real-time gives you the ability to manage your business as it happens... not after it happens.
- Our system facilitates a lasting interaction with your customers, giving you more opportunities to discuss additional services.

### REDUCE COSTS

- Having to double check data for accuracy between multiple systems costs you time and money. With ProfitZoom,™ you can run your business more accurately and efficiently.
- ProfitZoom™ can be hosted externally to reduce your IT expenses.
