

Protect critical IT investments and identify cost-efficiency opportunities by benchmarking portfolio spend allocation, performance, and staffing levels to peer organizations.

## WHY NOW

To prepare for the changes associated with PortfolioStat 2.0, executives need a better understanding of the current state of their IT portfolio. In addition, executives need actionable benchmarking insights to drive cost-efficiency decisions.

## WHAT YOU GET

CEB's Government IT Portfolio Benchmarking report captures key portfolio composition, performance, and staffing metrics— and it compares your organization to those of similar mission and size.

### Custom Benchmarking Report

Reveal your most critical opportunities for cost and quality improvement.

### Metrics Designed Using FedScope, FedView, and E300/E53 Data

Benchmark your agency using metrics that matter.

### Advisory Support

Build action plans based on best practices

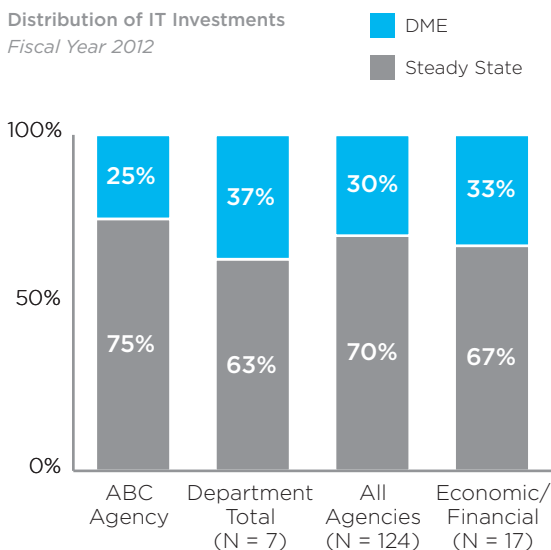

## ORGANIZATIONAL BENEFITS

- **Justify Budget Decisions:** Build the business case for cost-cutting initiatives and targeted resource allocation.
- **Demonstrate Success:** Measure the success of continuous improvement efforts and initiatives.
- **Act with Confidence:** Know your actions are right when it matters most.

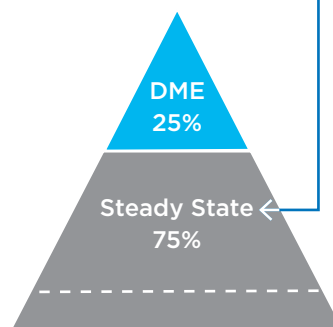

## Testimonial

*"I have been asking my team to produce this type of report for months. This report will fast-track our ability to make critical decisions with confidence."*

Distribution of IT Investments  
Fiscal Year 2012

**CEB Recommendation:** Identify redundancies and inefficiencies in Steady State to "self-fund" innovation and modernization projects.
