Business Edition Implementation

Cornerstone OnDemand has completed hundreds of successful implementations with our existing clients, which has led to a repeatable methodology and processes for implementation that help ensure new clients go live on time and with the configuration they need to drive business results.
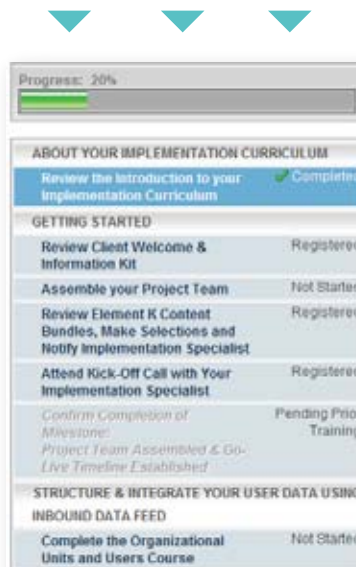

A Business Edition implementation is conducted remotely by a Cornerstone OnDemand Implementation Specialist. This approach follows a self-paced online curriculum with oversight and subject matter expertise from an Implementation Specialist.
This package is designed for mid-sized clients and includes the following deliverables:

- Group Configuration workshop to review default settings
- Group Technical workshop to review mapping and data files
- Individual weekly implementation coaching calls

As a part of the self- guided implementation process, clients have access to an implementation curriculum within Cornerstone's Client Success Portal. Each client's curriculum is assigned to coincide with the specific modules the client is deploying. The designated curriculum provides step by step instructions that will guide the client through the implementation process.

ATTRIBUTES OF A BUSINESS EDITION IMPLEMENTATION CANDIDATE:

- Shared business requirements throughout the organization
- A centralized talent management organization
- Established talent management processes for the applicable modules purchased
- Flexible timeline for deployment
- Available resources to learn and configure
- Decision maker on the project team
- Previous experience with talent management software
- Comfort with online training, documentation and help tools

BENEFITS

- Assigned curriculum provides administrators with an overview of the entire implementation process
- Required steps and timing are provided in detail for each implementation task
- Self-guided steps and online courses are supplemented with weekly coaching sessions with your designated implementation specialist
