

Utilize cloud to drive innovation and stay ahead

Damovo Aquila, our customer-centric cloud aggregation platform, offers you a **customisable, secure and reliable** portfolio that optimises your Total Cost of Ownership (TCO), reduces risk and builds your bridge into the digital future.

Aquila aggregates a large variety of best-of-breed cloud solutions in Unified Communications and Collaboration, Enterprise Networking and Contact Centres. Within the Aquila portfolio our comprehensive UCC cloud proposition enables agility and flexibility, whilst retaining data ownership and security.

Damovo's Aquila private cloud UCaaS offering combines the best of both worlds, enabling OPEX pricing, agility and flexibility, while maintaining on-premise advantages such as feature richness, data ownership and security."

Freedom and full control

Damovo Aquila UCC offers you a full range of best-of-breed UCC solutions – modular, tailored to your individual business challenges and matching different architectures (public, private, hybrid).

Built on technology from industry-leading vendors like Avaya, BlueJeans, Cisco and Mitel, Damovo Aquila UCC is an unparalleled offering enabling you to build a bridge to the digital future.

In today's fast moving environment we will ensure that our portfolio is constantly optimised to enable you to stay competitive and innovative in today's digital world.

UCaaS Solution: The best of on-premise UCC features in the cloud!

The highlight of our UCC cloud portfolio is the Aquila UCaaS private cloud for enterprise powered by Mitel.

Being part of Damovo Aquila, this new solution will lower the barriers if you want to move UCC applications to the cloud, whilst protecting your existing legacy investment.

Damovo's private UCaaS cloud solution offers you all the benefits of cloud technology, including pay-as-you-use billing, increased agility and flexibility, scalability, simple deployment, disaster recovery and high availability.

Contrary to many competing solutions, Damovo also gives you complete freedom of choice and full control.

Full control

Pay as you use

Data security

Seamless Integration

Investment Protection

Multichannel Contact Center

Your Aquila UCaaS private cloud advantages

All data is securely stored on dedicated systems and remains your property. You can either opt for a bundled offering that has been designed by Damovo, or select your own components – including data and SIP provider – in the datacenter of your choice. Self-manage the solution or select a managed service from Damovo.

The Aquila UCaaS solution also includes an advanced multichannel contact centre. Customers can avail of this without having to invest in additional hardware or software. In addition, Damovo provides seamless integration with Microsoft Skype for Business and CRM applications such as Salesforce.com.

- Protect your existing hardware investment by simply migrating to the cloud
- Easily integrate Microsoft Skype for Business, Salesforce.com or your individual CRM-System
- Gain valuable insights with our Monitoring as a Service (MaaS) with end-to-end-monitoring
- Take advantage of the multichannel contact center functionality
- Secure your peace of mind with our cloud optimised service layer – guaranteeing an exceptional 30-minute response to high priority calls
