*Thursday 26th February 2015 –
Agile Workshop
Simpsons in the Strand, 100 Strand,
London WC2R 0EW*

This workshop will cover what is considered to be the “must haves” of a successful agile implementation. We will share experiences discovered after many successes, plus the lessons learnt and common failure points from challenging implementations.

We will look at the factors you need to apply to increase the chances of delivering a successful project, including the elements that are to be expected as part of the journey and those that are often an illusion. All brought to life with real case studies, examples and insights.

After attending the event, you will have better understanding of how agile works in real life, get a good grasp of the phases of an organisation wide agile deployment, and learn how to master the process.

THE AGENDA

9.30 Registration/Tea/Coffee

9:55 Welcome Note
