

World Petrochemical (Aromatics) Industry Study

ICIS's **World Petrochemical Industry Study on Aromatics** delivers in-depth analysis of the global supply and demand situation for benzene, toluene and xylene, and their respective derivatives.

It provides insight into how the cyclical petrochemical industry will look in the future, using reconciled data and detailed analysis. Forecasts, trade flows, supply, demand and capacities are all covered.

Table of Contents

- I Introduction**
- II Worldwide Summary**
 - 2.1 Executive Summary**
 - 2.2 Worldwide Aromatics Balances**
 - 2.2.1 Aromatics Demand
 - 2.2.2 Aromatics Supply
 - 2.2.2.1 Feedstocks
 - 2.2.2.2 Supply & Demand
 - 2.2.3 Aromatics Capacity Developments
 - 2.2.4 Trade Developments
 - 2.3 Aromatics - Economic and Pricing Trends**
 - 2.3.1 Benzene Pricing
 - 2.3.2 Benzene Production Economics
 - 2.3.3 Toluene Pricing
 - 2.3.4 Toluene Manufacturing Economics
 - 2.3.5 Mixed Xylenes Pricing
 - 2.3.6 Mixed Xylenes Manufacturing Economics
 - 2.3.7 Basis of Price Forecasts
 - 2.3.8 Forecasts - Manufacturing Economics
 - 2.3.9 Price Forecasts
- III Regional Analysis**
 - 3.1 North America
 - 3.2 Latin America
 - 3.3 Europe
 - 3.4 Former USSR
 - 3.5 Africa
 - 3.6 Middle East
 - 3.7 North East Asia
 - 3.8 South Asia and the Pacific
- IV Country-by-Country Supply/Demand Balances**
- V Country-by-Country Derivative Capacity**
