

The **World Synthetic Elastomers Annual Study** provides an exhaustive review of developments in the supply, demand and trade of global synthetic rubber markets, as well as in changes in technology and prices for those markets.

The annual study data coverage spans from 2000 - 2025. It is comprised of two volumes -

- 1) Product and Market Review - examines the supply structure, technology developments, product markets and price evolutions
- 2) Statistical Compendium - lists details of industrial producing plants and supply/demand balances for individual key countries, regions and globally

Commodities covered:

- Polybutadiene (BR)
- SBR (including SBCs)
- Styrene-Butadiene Latices (SBL)
- Ethylene Propylene Diene Monomer (EPDM)
- Nitrile Elastomers (NBR)
- Polychloroprene (CR)
- Butyl Rubber (IIR)
- Polyisoprene (IR)

Regions covered:

- North America
- Latin America
- Europe
- Former USSR
- Africa
- Middle East
- North East Asia
- Asia and Pacific

Table of Contents

VOLUME 1

- 1 Introduction
- 2 Medium-long term projection
Scenarios, assumptions and parameters
 - 2.1 Projection of Demand
 - 2.2 Projection of Supply
- 3 Executive Summary
Product Review - with global and regional data
 - 3.1 Polybutadiene (BR)
 - 3.2 SBR (including SBCs)
 - 3.3 Styrene-Butadiene Latices (SBL)
 - 3.4 Ethylene Propylene Diene Monomer (EPDM)
 - 3.5 Nitrile Elastomers (NBR)
 - 3.6 Polychloroprene (CR)
 - 3.7 Butyl Rubber (IIR)
 - 3.8 Polyisoprene (IR)

VOLUME 2

Statistical Compendium

This section provides a comprehensive analysis of past and future developments of the world commodity rubber markets, together with an extensive and consistent supporting database.

The forecasts were derived based on each country's past performance, future plans and trading patterns.

Annex 1 – World Motor Vehicle production by country 2008, 2009, 2010 and 2011
