

ICIS Urea Methodology Consultation

Response 1

Questions specific to global Urea pricing reports

ICIS is considering incorporating the current Egypt FOB price in The Market into a North African FOB quote with Algerian prices once the new Sorfert production facility comes onstream and starts exporting urea.

Q1 – *Do you think that the current Egypt FOB price in The Market should be incorporated into a North African FOB quote with Algerian prices once the new Sorfert production facility comes on stream and starts exporting urea?*

Yes. I would also suggest a two tiers quote for the Egypt / Algeria price quotes One for European markets and a separate one for non-European destinations.

Q2 – *Do you think an Egypt FOB quote should be included in the Urea (Europe) report?*

Yes... and once Sorfert would start exporting, then the North Africa or Egypt/Algeria quote for European markets should be included.

Q3 – *Would you like to see a prilled urea assessment for Brazil CFR in The Market?*

Yes please!
