

ICIS Methanol Methodology Consultation

Response 7

Questions specific to methanol pricing reports

Thank you for your call on above issue. After a careful review with my team here, I recommend to keep a separate Iranian material quote and non-Iranian material quote in order to monitor price trends from different destinations.

As for South East Asia, we would prefer to keep it as its under one geographical region as this would include Thailand, Indonesia, Malaysia etc; so no need for change.

In regards to question 2, the price range is wide comparing your publications to Platts, during the same period. Maybe because you are quoting the low end of the Iranian on the price quote, I suggest to apply the new pricing quote as soon as you get all the responses say within a month.
