

World Petrochemical (Olefins) Industry Study

ICIS' **World Petrochemical Industry Study on Olefins** delivers in-depth analysis of the global supply and demand situation for ethylene, propylene and butadiene (C4s), and their respective derivatives.

It provides insight into how the cyclical petrochemical industry will look in the future using reconciled data and detailed analysis. Forecasts, trade flows, supply, demand and capacities are all covered.

Table of Contents

I Introduction

II World Summary

2.1 Executive Summary

- 2.1.1 Demand Growth
- 2.1.2 World Capacity and Production
- 2.1.3 The Global Outlook for Inter-regional Trade
- 2.1.4 Trade in Ethylene and Derivatives
- 2.1.5 Trade in Propylene and Derivatives
- 2.1.6 Trade in Butadiene and Derivatives

2.2 Worldwide Olefins Balances

- 2.2.1 Demand Trends
- 2.2.2 Production Trends
- 2.2.3 Capacity Developments
- 2.2.4 Trade Forecasts for Olefins and Derivatives

2.3 Olefins Production Economics and Pricing Trends

- 2.3.1 Ethylene
- 2.3.2 Propylene
- 2.3.3 Butadiene

III Regional Analysis

- 3.1 North America
- 3.2 Latin America
- 3.3 Europe
- 3.4 Former USSR
- 3.5 Africa
- 3.6 Middle East
- 3.7 North East Asia
- 3.8 South Asia and the Pacific

IV Country-by-Country Supply/Demand Balances

V Country-by-Country Derivative Capacity
