

Energy retrofit packages

Buy 10 energy packages, get 1 FREE (\$290 value!)

Purchases must be made by 8/30/10 from your supplier of electrical products

Lutron's wireless controls and sensors are engineered to work together for simple control of electric light and daylight. Great for retrofit and renovation projects, these wireless products install easily, save energy and money, and are now available in three convenient packages, as well as three vacancy only versions.

- **Occupancy/vacancy sensors**—save energy by ensuring the lights are not left on when the room is unoccupied
- **Daylight sensors**—increase savings by automatically turning off electric light when daylight is sufficient

Simple energy retrofit package*
