

This home can

SAVE YOU MONEY

A new home is a major purchase.
Why not purchase a home that can help you save money?

Lower your energy costs

With a solar home, you generate your own clean, more affordable energy at a rate that's generally lower than the current utility price.

Help control your energy costs

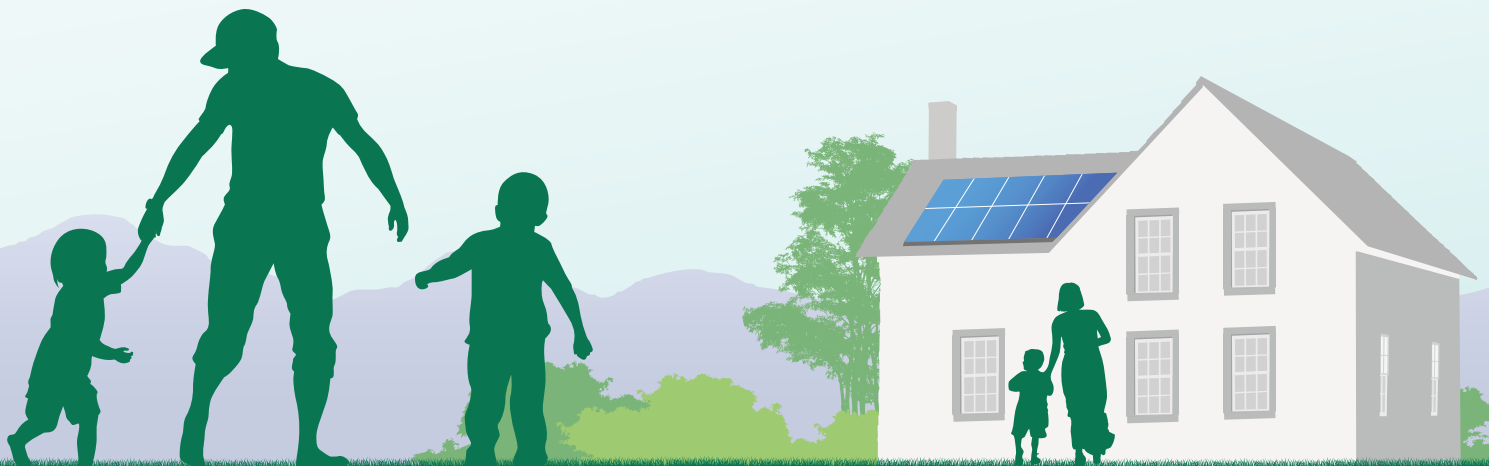

Traditional utility costs tend to rise, but solar energy costs are low, consistent and predictable.

It's clean energy with no worries

SolarCity constantly monitors your system and guarantees that it's working. We even cover repairs and insurance at no additional cost.

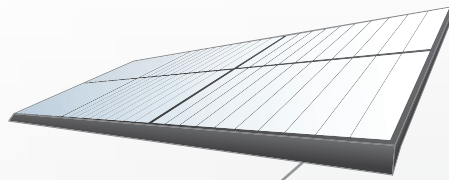

Help your home stand out

Solar power is a huge plus when it comes time to sell your home. It sets your home apart with a clean, affordable energy solution that homebuyers want.

Clean, more affordable energy

HOW IT WORKS

1

Panels - Each solar panel converts sunlight into direct current (DC) electricity.

2

Inverter - The inverter converts direct current (DC) electricity into alternating current (AC) electricity. You're producing your own power!

3

Utility Meter - The utility meter continually measures electricity consumed by your home.

4

Utility Grid - You are still connected to the grid so you can draw electricity when you need it.

5

Monitoring - You can check your system production at any time using mysolarcity.com or the MySolarCity smartphone app.

A solar power system is customized by SolarCity for your home. Pricing and savings vary upon system location, system orientation, system size, government rebates, if any, and local utility rates. SolarCity financing, incentives, anticipated savings and other terms may vary and are not available in all locations. Savings on electricity costs are not guaranteed. SolarCity will repair or replace broken warranted components for the term of the SolarLease. Please carefully review the terms and conditions of the SolarLease, the SolarCity Production Guarantee, SolarCity's Limited Warranty, and the Solar Operation and Maintenance Guide for complete details or visit us at www.solarcity.com.
