Sage Mobile Payments

X Sage Exchange Enabled

Turn your cell phone into a mobile payments device

Sage Mobile Payments converts your cell phone, smart phone or tablet into a highly secure and convenient 'use anywhere' credit card terminal.

Available for use on more than 400 mobile devices, Sage Mobile Payments is a leading secure payment solution that uses end-to-end encryption and meets all PCI requirements—rock solid security credentials that most mobile payment providers just can't deliver.

Going Mobile with Sage Means More Business; More Security

Increase your sales by accepting credit cards, in-the-field, on the job site, at the tradeshow, at the charity event…virtually anywhere 'on the go', so you can wrap up the deal without delay

Instant setup, no waiting with an existing Sage merchant account

Complete solution – no third parties required: Sage Mobile Payments comes bundled with a low cost merchant account making it quick and easy to get up-and-running with mobile payments

Secure Credit Card Reader supports more smart phone types than all of the competition including iPhone3, iPhone4, iPad, Droid and BlackBerry

PCI compliant device: The Sage Mobile Payments card reader is an industry leading, end-to-end encrypted device which eliminates electronic card skimming devices from stealing credit card data

Ultra Secure means you can trust that all of your transaction data is encrypted before it leaves your cell phone. Absolutely no personal data is retained on your device

Maximize the value of integrated payments: all "Sage Exchange Enabled" devices, such as Sage Mobile compatible cell or smart phones, have the ability of connecting with software solutions, such as accounting systems, that are integrated with Sage Exchange

Robust Features + Rich Functionality = Revenue Faster

Sage Mobile offers some of the lowest rates on transactions and works with our optional card reader for the fastest, most secure way to get card present rates. With features such as real-time authorization, emailed receipts, void and online reporting, you can take payments virtually anywhere and realize revenue faster.

No Additional Hardware Required

The application works on more than 400 mobile devices, so you can use your current cell phone and current calling plan. Simply pay-as-you-go if you don't already have a data plan—it's just pennies per transaction. Sage Mobile also includes a web interface so you can securely enter credit card data from your PC or Mac desktop.
