Sonatype Training & Curriculum

Component Lifecycle Management (CLM) Developer Workshop

The CLM Developer workshop provides the knowledge and practical instruction to get developers started with Sonatype CLM. Take this workshop to get up to speed quickly and understand how component management can be a natural part of your development process. Attendees will see how policy-based guidance for component selection and component governance will speed their development efforts and help ensure trusted applications.

Goals for this course include:

- Understanding the benefits of Sonatype CLM
- Discovering how to use component management in the Eclipse IDE
- Learning how to triage issues and prioritize remediation efforts
- Becoming proficient at fixing flawed components in your applications

Recommended for:

Ideal for any person involved in a development capacity such as application developers, architects, and development managers.
