

Sonatype Training & Curriculum

Nexus Pro CLM Architecture Quickstart

The Nexus Pro CLM Architecture Quickstart gives you the knowledge and practical instruction necessary to leverage component management in your Nexus environment. Take this workshop to get up to speed quickly and understand how component policies can be used to guide your release and promotion processes. A focus of this workshop will be exposure to different release-management architecture options using the staging and release features of Nexus Pro, CLM Edition.

Goals for this course include:

- Understanding how staging and promotion can be architected to meet your requirements
- Learning about the different repository types and how they support your repository strategy
- Determining the best architecture design
- Learning from real-world examples from other Nexus and CLM users
- Implementing a project with Nexus staging

Recommended for:

Ideal for any user that is involved in build management and Continuous Integration support including IT Ops / DevOps, and build managers.
