

Splunk at AWS Pop-up Loft

The Power of Logs in DevOps

10:30 am – 11:30 am	Check-in, Networking & Ask an AWS or Splunk Expert	
11:45 am – 1:00 pm	Network Lunch & Splunk Labs	Informal & informational Birds-of-a-feather roundtable discussions over lunch. Got logs? Lets Chat.
1:00 pm – 1:45 pm	Schoolhouse Rock – Nouns, Verbs, and Logs	Leverage your AWS Cloudtrail & AWS Config with Splunk to ensure security & compliance. Monitor, correlate & visualize user activity and resource configuration in real time through native and pre-built Splunk search & dashboard capabilities
2:00 pm – 2:45 pm	AppDev Perspectives from a Technology Change Agent	Developer perspective on data ingestion from AppDev. Example of Splunk integration with AWS Elastic Beanstalk to be highlighted along with the value of data across the App Dev Lifecycle.
3:00 pm – 3:45 pm	DevOps Data Dive	Review and discuss how the DevOps eco-system (Git, Jenkins, Docker, Chef, more) can be visualized to help run DevOps practices like continuous integration and continuous deployment
4:00 pm – 4:30 pm	Hear from your peers	Panagiotis “PJ” Papadomitsos, Head of Mobile Intelligence Infrastructure at Splunk, will present how Splunk’s MINT product engineering team leverages AWS to power one of the most advanced Mobile Operational Intelligence platforms in the world, processing more than 3 billion events per day.
6:00 pm – 9:00 pm	Fireside chat with Amazon CTO, Dr. Werner Vogels	Jeremy Edberg (Reddit/Netflix) and Valentino Volonghi (Adroll) will be joining Dr Werner Vogels for a fireside chat about startups, technology, entrepreneurship and more. Jeremy and Valentino have been recognized by AWS as Community Heroes, an honor reserved for developers who’ve had a real impact within the community. Following the talk, we’ll kick off a unique networking social including specialty cocktails, beer, wine, food, and party swag!
