# Stir, Heat, Evaporate

## The new Thermo Scientific Reacti-Therm™ Sample Derivatization System is ideal for GC or HPLC and other small scale reactions.

Its modular design, with interchangeable accessories, make it adaptable to a variety of vials sizes and types, as well as offering heating, mixing and evaporating of the sample. The new digital readout gives you a clearer view of your sample's temperature.

- **Flexible** – available in single and triple block units in heating/evaporation-only and heating/evaporation/stirring models
- **Precise** – optional remote temperature probes provide greater accuracy
- **Consistent** – uniform, steady heating from 10°C to 200°C
- **Durable** – stainless steel construction
- **CSA certified and CE compliant**; complies with CE certification markings
