

THOMSON REUTERS RESEARCH

A Select List of Published Work by Thomson Reuters Researchers

Since 1988, researchers at Thomson Reuters have conducted studies of disease progression, treatment patterns, health outcomes, and their associated costs to patients, employers, health plans, and the government. These studies have resulted in over 350 peer-reviewed articles published in leading journals, which have made a substantial contribution to the body of literature used to formulate policy decisions and improve healthcare for Americans.

Authors in bold typeface are (or were at the time the work was written) Thomson Reuters staff.
