

COLLABORATIVE CLASSROOM SUITE

Enhancing Education Through Technology (E2T2)

Enhancing Education Through Technology's funding goal is to improve student achievement through the use of technology. Additional goals include helping all students become technologically literate by the end of 8th grade and integrating technology with teacher training and curriculum development to establish innovative, research-based instructional methods that can be implemented widely.

The Collaborative Classroom Suite addresses the requirements for E2T2 funding through:

- CPS™ as a perfect solution to collect, manage, and analyze data to enhance teaching and school improvement.
- ExamView®/CPS™ as curricula that integrates technology to meet challenging state standards.
- Mobi™/Workspace™ as seamlessly integrated technology to engage students and improve instructional lessons on difficult topics (secondary math, science, and geography).
