

# INSIGHTS AND INNOVATION THAT TRANSFORM CARE.

## Lung Health Programs: Inova Health System, Fairfax, VA Rush University Medical Center, Chicago, IL

Need help designing and deploying a lung health program? During this unique, immersive one-day experience, you'll visit a Center of Excellence, where experts will share best practices and lessons learned. This will enable you to create, launch, and manage a best-in-class program.

**Intended for:** Hospital administrators, heads of service lines, physician champions

### LEARNING OBJECTIVES

The lung health care continuum can be inefficient and ineffective, leading to late-stage diagnosis and poor patient outcomes. If your goal is to improve clinical and economic outcomes, our Educational Centers of Excellence provide the insight you need to evolve lung health diagnosis and treatment.

- Program evolution
- Economic value
- Best practice sharing
- Reimbursement
- Daily operations
- Role of the lung navigator
- Multidisciplinary approach
- Collaboration with the Cancer Center
- Patient identification and flow
- Physician and patient education and outreach
- Procedure room set-up and components for success
- Pathology, including best practices and process
- Quality assurance

# CENTERS OF EXCELLENCE

Inova Health System has been growing their Interventional Pulmonology program for six years. With a support team of dedicated respiratory therapists, RNs, and a lung navigator, the faculty at Inova is uniquely positioned to help you build a lung health program from the ground up.

The Rush Lung Center is a comprehensive, multi-specialty program offering high-quality early lung cancer detection, diagnosis, and treatment services. The passionate team of physicians, advanced practitioners, nurses, and therapists offer patients the latest IP and thoracic surgical options, as well as an advanced lung nodule program.

To register for this program, scan the QR code or contact your Medtronic Team for more information.
