

A2B Tracking RFID Solutions

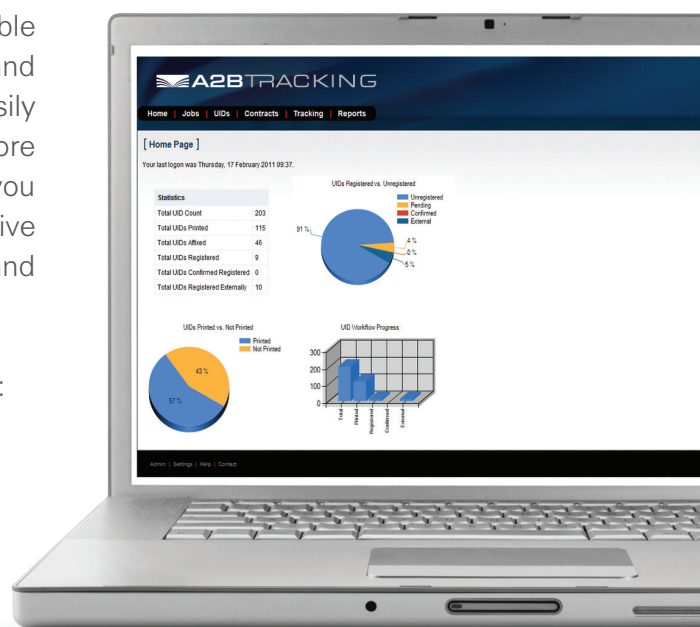

RFID Asset Management Software

Performing accurate and timely inventory is mission critical, whether tracking serialized assets or non-serialized stock and impacts every aspect of your business. The A2B Tracking software platform is purpose-built for asset management and inventory control using RFID and barcode technologies that deliver both value and performance. Utilizing A2B Tracking's military-proven scalable systems, corporations and governments will benefit from significant time and cost savings while gaining visibility of their critical assets, spares, stock, and equipment.

A2B Tracking's solution combines durable RFID and barcode tags, Smartphones, and tablets with cloud-based software which easily integrates to your environment and is more intuitive than other barcode systems. When you deploy A2B Tracking's software you'll receive instant visibility into your asset's location and when an asset has moved.

Track the following Unique Assets or Stock:

IT Equipment	Repairs
Production	Parts
Rentals	Fixed Assets
Office Equipment	Containers
Shipments	Tools

Experience the Benefits of A2B Tracking

Zebra RFD 8500 is a high-performance, rugged RFID handheld reader with Samsung smartphone for use in very diverse environments.

- > Leverage Smartphones for RFID tracking
- > Compatible with all existing barcode tags
- > Expedite locating specific assets
- > Perform fast and accurate inventories
- > Increase asset and resource utilization
- > Improve audit readiness
- > Enhance security for high value items
- > Manage asset accountability
- > Pre-integrated with the Zebra RFD8500 sled
- > Fixed RFID gateways provide always-on tracking

MANAGE YOUR ASSET DATA IN THE CLOUD

Our comprehensive cloud-based application stores your data in a secure, centralized database, enabling you to work from multiple locations anywhere in the world, so your asset data and reporting is always accurate and up-to-date. You can access our application from the web, Smartphone or tablet. A2B Tracking software is a comprehensive web-based solution for asset accountability and a real-time representation of your asset's location, custody and readiness.
