FMIS Enhanced Purchasing
Enhanced Purchasing Control for Deltek Vision®
FMIS Enhanced Purchasing for Deltek Vision®

Comprehensive Purchasing Control fully integrated with Deltek Vision®

WHY ENHANCED PURCHASING?
FMIS Enhanced Purchasing for Vision provides comprehensive and integrated Purchasing control for Deltek Vision® customers requiring more than the Vision Purchasing Module.

FMIS Enhanced Purchasing for Vision is ideally suited to companies with complex purchasing requirements, especially where inventory or stock is purchased for production, engineering or sale to clients.

With FMIS all purchases can be allocated to a specific project.

WHAT IS ENHANCED PURCHASING?
FMIS Purchasing provides enhanced control over the whole buying cycle from purchase order approval through to goods receipt and invoice matching. In-built OCR scanning allows for fast, efficient bulk processing of invoices. Product catalogues and vendor management make ordering and tracking inventory or stock more efficient and cost effective.

Flexible workflows improve expenditure control and streamline approvals to avoid project delays. Effectively manage complex orders with partial deliveries or multiple vendors.

Users, vendors and projects are shared with Vision avoiding data duplication. All purchases are published to Vision providing a full purchase history and project visibility from either solution.

KEY BENEFITS
- Multi-company
- Multi-lingual
- Customisable workflows
- Electronic authorisation
- Complex kitting and assembly
- Drop ship
- Requisitions
- Sourcing
- Full product category
- Full vendor parts catalogue
- Full import for all setup
- Manage vendor relationship
- User defined fields

- Customisable requisition forms
- Requisition workflow routing
- Access to buying history

fmis.co.uk
AUTHORISATION MATRIX
- Role based authorisation limits
- Integration with HR, finance and project roles
- Full workflow management
- Electronic authorisation

VISION INTEGRATION
Integration with Deltek Vision® minimises data duplication between systems, improves accuracy and allows for real time reporting on projects and expenditure at any level.

All Purchase Orders can be matched to vendor invoices within the FMIS invoice matching facility. For those customers who already have Vision Purchasing, FMIS will automatically synchronise the Vision purchase tables allowing you to show commitment on your Vision reports.

The system allows you to create a commitment accruals batch as a reversing journal, allowing you to specify which particular range of purchase orders you need to post through to represent a financial accrual commitment.

FMIS Fixed Assets maintains a list of all General Ledger accounts relating to capital. Any invoices posted to these accounts within Vision are posted into the Fixed Assets InTray, where they can be checked and information added where required.

If you hold stock on your balance sheet then the FMIS Stock Control module will allow you point of change or periodic creation of a stock movement journal.
MORE SOLUTIONS FOR DELTEK VISION

FMIS Enhanced Purchasing is part of a wider Enhanced Asset Management and Production Control suite available to Deltek Vision Users.
Exponent has been using Vision since 2007. We found that though the majority of the company was not purchasing intense, there were several groups that were, and each had their own process. It was time to unify and standardise the process. In FMIS, Exponent found a system that provided the flexibility we needed to accommodate our approval matrixes while still seamlessly interacting and taking advantage of the capabilities of Vision.

Sue Lawless, Exponent

FMIS customer service is excellent. Our version was initially adapted for our need to track customer-owned materials that our company holds. As our business developed and diversified, FMIS worked with us to improve speed and functionality for managing large quantities of items and to expand invoicing capabilities. Users in our organization are very pleased by the creativity and responsiveness of the FMIS team in helping them meet new challenges.

Mike Kiess, Veterans Corps of America

Love that this software does all of my inventory management. Also love that when I need something special, FMIS works with us until it is delivered.

Jayne Robnett, GBA Systems Integrators, LLC
