

# FMIS Production Control

Production Control Software for Deltek Vision<sup>®</sup>

# FMIS Production Control for Delttek Vision®

Comprehensive Production Control fully integrated with Delttek Vision®

## WHY FMIS PRODUCTION CONTROL?

FMIS Production Control extends the functionality of Vision to include full Materials Resource Planning (MRP) for Delttek users with manufacturing or bespoke engineering requirements.

## WHAT IS PRODUCTION CONTROL?

FMIS Production Control combines a flexible set of modules to provide a complete MRP solution from sales through Assembly, Kitting and Stock Control to Shipping. The FMIS suite comprises the following integrated and flexible functions:

- Quotations
- Sales orders
- Requisitions
- Bills of Materials (BOM's for assembly and kitting)
- Shipping and despatch
- Equipment tracking
- Sales invoicing
- Demand fulfilment from stock, purchase order or production work order
- Stock and inventory
- Returns handling
- Serialisation

## KEY BENEFITS

- Complex Bills of Materials (BOM's)
- Flexible quote and order processing
- Extensive product catalogue
- Streamlined demand fulfilment
- Stock balance planning
- Equipment and stock tracking
- Shipping and despatch control

*Create quotes and sales orders to drive demand for production using flexible templates*

## BILL OF MATERIALS

- No limit to the number of levels within a BOM
- Create BOM's for sub-components
- Manage raw materials

## ORDER PROCESSING

- CRM to quote or order
- Fully customisable templates
- Flexible authorisation workflows
- Project creation
- Complex BOM assemblies and kits

					2,300.00	

## AUTO-REPLENISHMENT

- Demand profile provides planning input to the auto-replenishment process
- Allocate stock directly, through purchase orders or via production work orders
- Minimum stock levels and order quantity control
- Full visibility of stock availability across all locations

## PRODUCTION WORK ORDERS

- Orders generated from production demand and replenishment
- Generate work in progress (WIP) valuation
- Routing and workflows
- Surplus stock and serialised items booked back into stock
- Barcode and serialisation tracking
- Allocate work order time and expenses incurred to projects in Vision

## STOCK CONTROL AND INVENTORY

- Visibility of stock balances
- Stock takes and tracking
- Stock adjustments
- Send stock valuations to the balance sheet
- Manage Non-Conformance Reporting (NCR) and returns

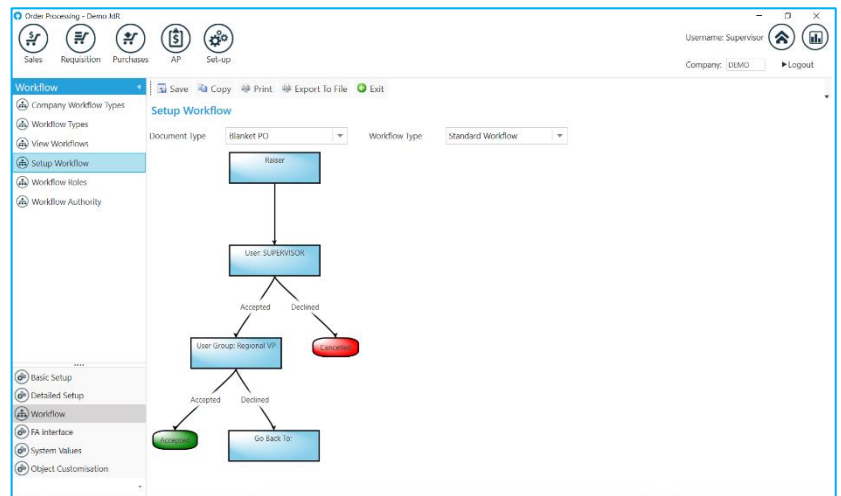

## VISION INTEGRATION

Integration with Deltek Vision® minimises data duplication between systems, improves accuracy and allows for real-time reporting on projects and expenditure at any level.

Any new jobs set up in FMIS Production Control will automatically be mirrored in Vision and at the end of any or all despatches you can create an invoice that is then posted into the Transaction Centre for your review and subsequent acceptance.

If you hold stock on your balance sheet, then the FMIS Stock Control module will allow you point of change or periodic creation of a stock movement journal.

*Flexible workflows for production routing*

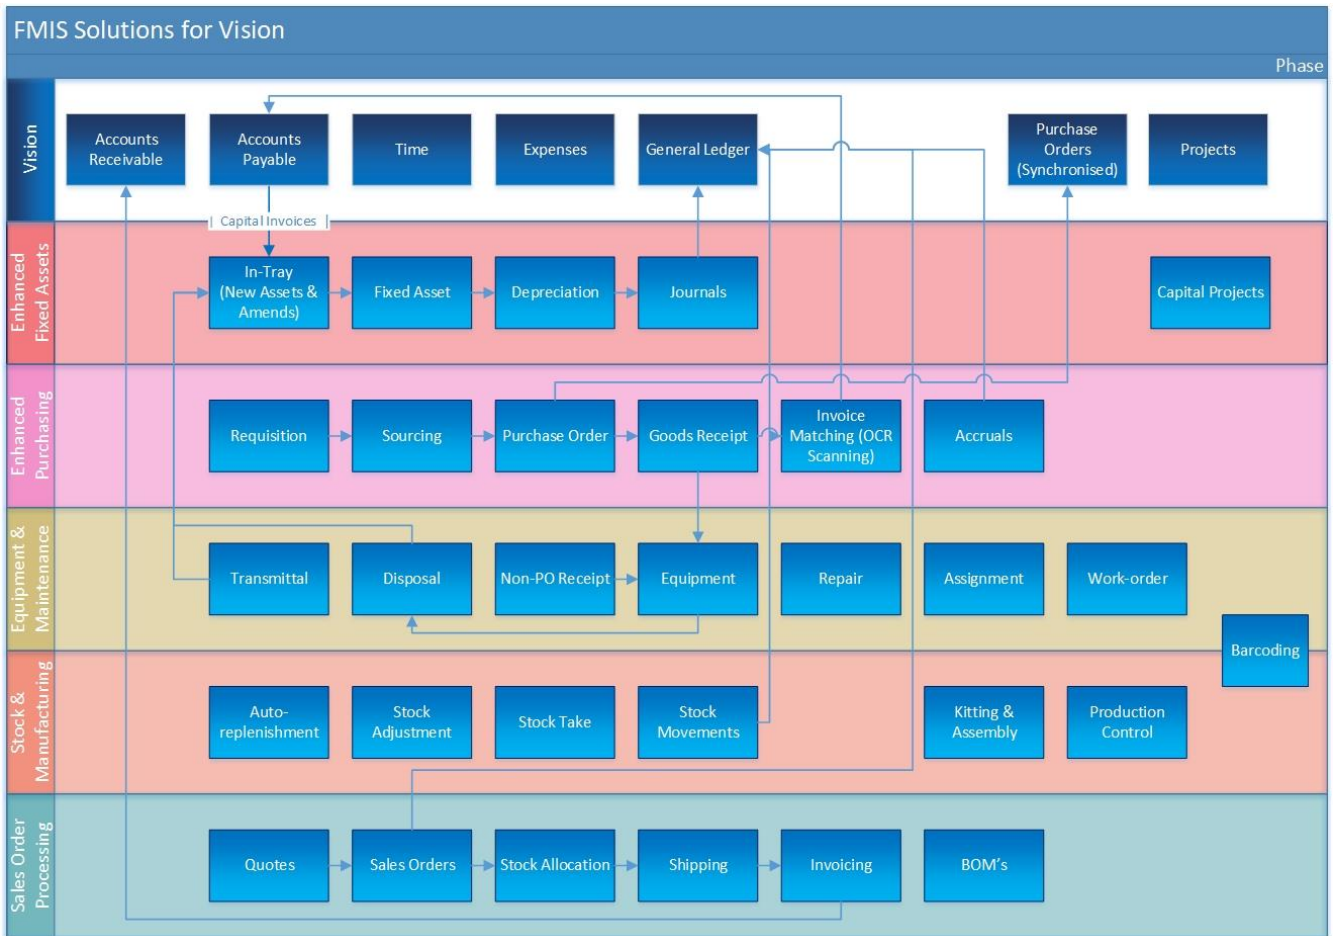

*Allocate stock directly, through purchase orders or via production work orders*

Line No.	Product	Part No.	Description	Note	Order Quantity	Unit	Price
1					0.00		0.00
2					0.00		0.00
3					0.00		0.00

## MORE SOLUTIONS FOR DELTEK VISION®

FMIS Production Control is part of a wider Enhanced Asset Management and Purchasing suite available to Deltek Vision Users.

*FMIS customer service is excellent. Our version was initially adapted for our need to track customer-owned materials that our company holds. As our business developed and diversified, FMIS worked with us to improve speed and functionality for managing large quantities of items and to expand invoicing capabilities. Users in our organization are very pleased by the creativity and responsiveness of the FMIS team in helping them meet new challenges.*

Mike Kiess, Veterans Corps of America

*Exponent has been using Vision since 2007. We found that though the majority of the company was not purchasing intense, there were several groups that were, and each had their own process. It was time to unify and standardise the process. In FMIS, Exponent found a system that provided the flexibility we needed to accommodate our approval matrixes while still seamlessly interacting and taking advantage of the capabilities of Vision.*

Sue Lawless, Exponent

*Love that this software does all of my inventory management. Also love that when I need something special, FMIS works with us until it is delivered.*

Jayne Robnett, GBA Systems Integrators, LLC
