The SIIA CODiE Awards are the industry's only peer-reviewed awards program. The first-round review of all nominees is conducted by software and business technology experts with considerable industry expertise, including members of the industry, analysts, media, bloggers, bankers and investors. The scores from the expert judge review determine the finalists.

SIIA members then vote on the finalist products, and the scores from both rounds are tabulated to select the winners. 51 awards were given this year for products and services deployed specifically for B2B software, information and media companies, including the all new Best Overall Business Technology Product, awarded to the product with the highest scores of both rounds of judging.
