

Focus on the client experience, not data entry

Introhive's AI-powered platform automates growth and unlocks the power of your relationships. So you spend less time managing databases and more time winning business with outstanding consulting, guidance and advice.

Winning advantages for every professional services firm

Leadership

Ensure ROI from your tech stack, reduce client churn and enhance visibility into the essential data and relationships that move the needle

Marketing

Reach the right audience with smart, relationship-centric marketing lists for targeted campaigns

Human Resources

Automate cultural change, reduce turnover, manage growth across locations and take the sting out of succession planning

Business Development

Equip teams with the data they need for seamless M&As and faster organic growth

Operations & IT

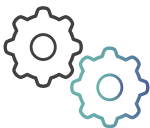

Break free from unreliable manual data entry with intelligent automation

Grow faster, smarter

AI-powered enterprise relationship management

From faster, more accurate borrower assessments to chatbots attending to clients' needs, artificial intelligence is revolutionizing financial services. And now it's simplifying how we spot and nurture the business relationships that matter.

Automate™

Eliminate administrative busywork and watch sales productivity and CRM adoption rise with automatic activity, contact sync and post-meeting wrap-up emails

Cleanse™

AI-powered data enrichment for a 100% reliable customer relationship management

Insights™

Build business with valuable relationship info—where and when you need it

Analytics™

Premium relationship data reports and dashboards to help you spot opportunities fast
