

## OVER 95% FORECAST ACCURACY AND 28% MODEL IMPROVEMENT COMPARED TO PREVIOUS METHODOLOGY

A global high tech manufacturer partnered with eClerx Digital to optimize marketing communications spend and to maximize ROI.

### Business Challenges

The client needed to optimize their marketing strategy for several product lines across multiple online and offline channels in order to determine the campaign impact on order volumes. The client also wanted to forecast daily visits, conversion, online orders, and call volume to staff call support personnel correctly.

The client required the support of a partner who could:

- Forecast sales and website traffic with 90% accuracy
- Analyze and report effectiveness of multiple campaign deep-dives weekly to enable in-campaign course correction
- Perform ad hoc analyses to understand and bridge sales attainment gaps

### Client Benefits

Consistently maintain greater than **95% forecast accuracy** across online and offline channels.

**28% average improvement** across all models compared to pre-eClerx Digital models in four weeks.

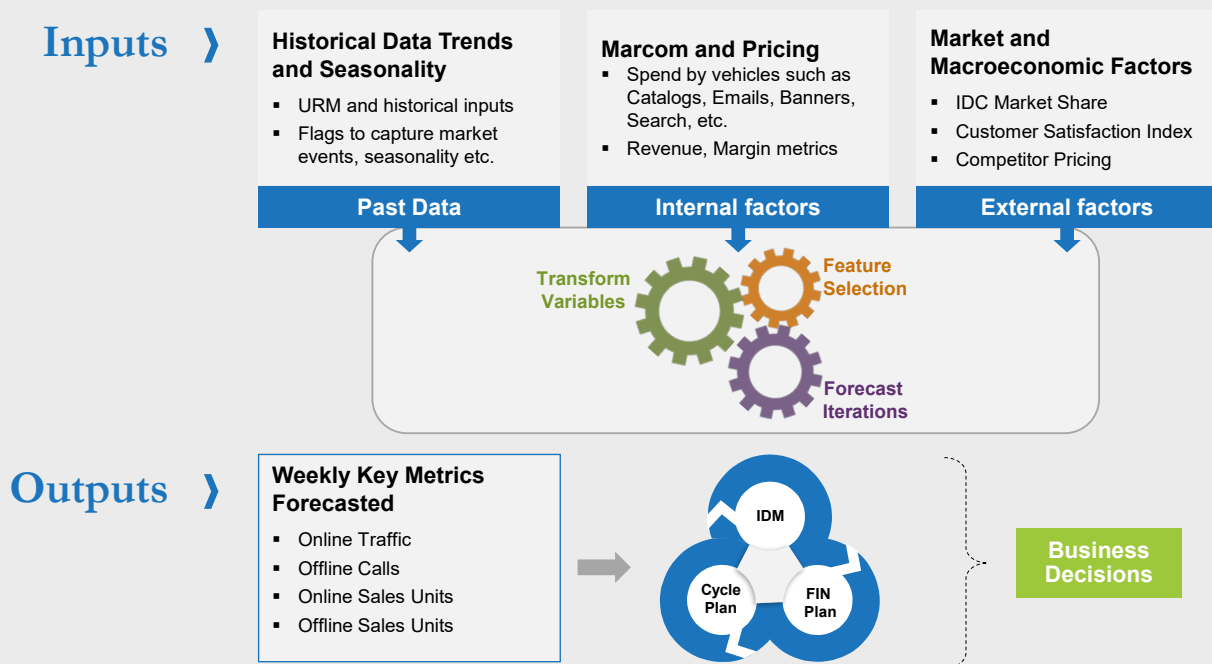

**75% reduction in turnaround time** for model building and reporting. Time savings was then reallocated into deep dives.

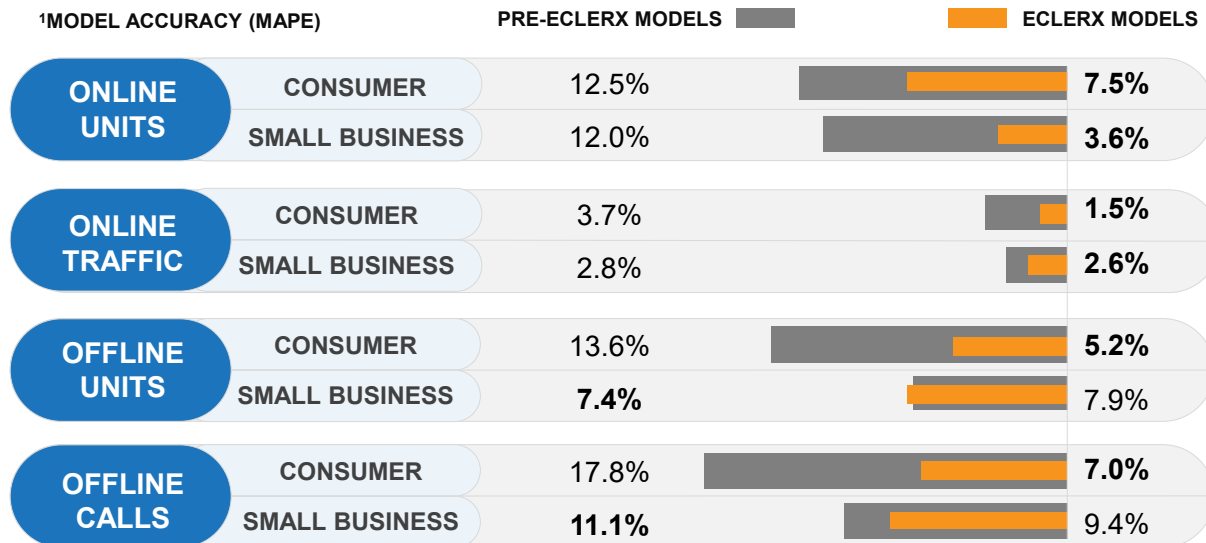

IDM [Integrated Demand Management] has always been a very sensitive area and complex tool. When we thought of changing partners, I was a bit scared about the transition but the great co-ordination and leadership from eClerx made this happen really well. There was a big learning curve but this team worked really hard to make it happen. In just a few months, the team was running IDM on its own and that too with so much improvement. The credit goes to every team member who came onboard. and ramped up fast."

-- Marketing Director, Global Technology Company

## The Process

## Comparison of pre-eClerx Models to eClerx Models

<sup>1</sup>MAPE (Mean Absolute Percentage Error) is measurement of deviation of forecast from actual - the lower value the better the forecast

### ABOUT ECLERX

eClerx provides critical business operations services to over fifty global Fortune 500 clients, including some of the world's leading companies across financial services, cable & telecom, retail, fashion, media & entertainment, manufacturing, travel & leisure, software and high-tech.
