

TRIANGLE PRODUCTS

Get Ready!

2 teams, 2 players each

Get Set!

Two-color counters

Play!

- 1 Decide which team will be red and which will be yellow. Yellow goes first, and then teams take turns.
- 2 One player places a counter on one of the individual triangles. The teammate finds the product. If the product is correct, the counter stays on the game board. If the product is incorrect, the counter is removed.
- 3 For each turn, teammates should trade roles.
- 4 A team may try or retry any triangle whose product has not been found.
- 5 When all the individual triangles on the board have been claimed, the game is over. The team with more counters on the game board wins.
