MULTIPLES BINGO!

What you need:

Players: 4

Materials: 4 Bingo cards (4 × 4 grid),
What to do:

1 Each player writes 16 different numbers from 10 to 60 in separate boxes on a Bingo card. The numbers can be in any order.

2 Player 1 rolls twice to get two 1-digit numbers. If the number is 0 or 1, he or she rolls again. The player writes the two 1-digit numbers on a piece of paper.

3 Each player then checks his or her Bingo card and circles the common multiples of the two 1-digit numbers, if any. Check each others' cards to be sure that the correct multiples have been circled.

4 Repeat **2** and **3**, taking turns rolling .

Who is the winner?

The first player to circle four numbers horizontally (⟷), vertically (↕), or diagonally (↗ or ↘), and call out "Bingo!" wins.
