# Progress and Logi Analytics Partner to Launch Progress OpenEdge Analytics360

*Partnership delivers a comprehensive, powerful analytics solution to thousands of Progress OpenEdge customers and partners worldwide*

**WESTFORD, Mass. (PUG Challenge) and MCLEAN, Va.–June 8, 2015**—[Progress](#) and [Logi Analytics](#), a leader in self-service analytics, today announced the release of [Progress® OpenEdge® Analytics360](#), a new custom analytics platform to help customers unlock the value of operational data. The announcement was made at the Progress Users Group (PUG) Challenge Americas 2015, being held at the Westford Regency Inn and Conference Center, Westford, Mass., June 7-10.

As the business environment changes, applications must respond and keep pace. This includes ensuring all applications today deliver best-of-breed analytics at their core. The combination of world class technology from Progress and Logi Analytics now gives customers a comprehensive, powerful analytics solution customized to their business as well as a competitive advantage in their respective marketplaces with a tailored next-generation analytics solution.

“Due to increased amounts of data stored in systems of records, our OpenEdge platform customers have analytics and business intelligence as their top priority in 2015 and beyond,” said Jerry Rulli, President, OpenEdge business unit at Progress. “The OpenEdge Analytics360 platform not only combines industry leading business intelligence and data tools, but the pre-built content will provide customers with a more rapid time to market, reduced cost and faster return-on-investment. This gives the OpenEdge Analytics360 platform a definite advantage over traditional BI tools.”

“Analytics aren’t one-size-fits-all, and end users need to be empowered to access the data they need, when they need it, without technical assistance,” said Brett Jackson, President and CEO, Logi Analytics. “We are pleased to be partnering with Progress to offer customers intuitive self-service analytic capabilities tailored to individuals’ specific roles and skills, which will help drive user adoption across your business.”

Key features in the Progress OpenEdge Analytics360 platform include:

- A complete range of self-service analytics, from dashboards and reports, end user authoring, and visual analytics.
- Highly customizable interface with advanced data visualizations and feature-rich reporting.
- Flexible security settings and options.
- Customized output style to meet complex requirements.
- Pre-built KPIs for a quick and easy embeddable solution for ISV partners to deliver as part of their business applications.
- Service offerings from Progress Bravepoint to include Training, Mentoring, and BI Blueprint, a comprehensive document created collaboratively to outline the planned end result of your BI project.
