Sage 100 ERP

Sage 100 ERP Intelligence Reporting and FRx Component Comparison

When Microsot® announced the retirement of FRx®, Sage knew it needed to find customers an alternative solution that took reporting to the next level. No longer was simple General Ledger reporting enough, customers needed more. After an extensive search, Sage determined that Sage 100 ERP Intelligence Reporting was the ideal candidate to take customers from simple financial reporting to reporting and analyzing their entire ERP solution—the next evolution.

If your company purchased additional FRx modules and/or licenses in the past, Sage wants to make sure you receive Intelligence immediately. Intelligence and FRx are similar in their functionality; however, it's important to understand what the FRx product component equivalent is for Intelligence.

FRx Product Components	Sage 100 ERP Intelligence Reporting Equivalent
FRx Desktop - single user (for Sage 100 ERP FRx Standard Upgrades, Customers who do not own FRx, and Sage 100 ERP SB only. Bundled with new sales)	Intelligence Report Manager
