

IoT Reimagined

Improve processes, get new insights and deliver better customer experiences with the internet of things

Whatever industry you're in, IoT technology has the power to reimagine your business. It can improve employee efficiency, deliver better customer experiences and give you visibility of your supply chain, assets and operations.

The value of IoT to your business

Drives efficient business operations and cut costs

Provides greater insights to optimise products and services

Enables faster delivery of new products and customer service

Generates new business opportunities and revenues

Example IoT Solution Use Cases

Capturing data from connected devices to create smart, automated solutions and services.

Ensuring emergency equipment is in prime condition

Protecting assets

Securing business premises

Desk Space Monitoring

Enhancing customer services

Understanding customer trends

Minimizing equipment downtime

Tracking fleet vehicles

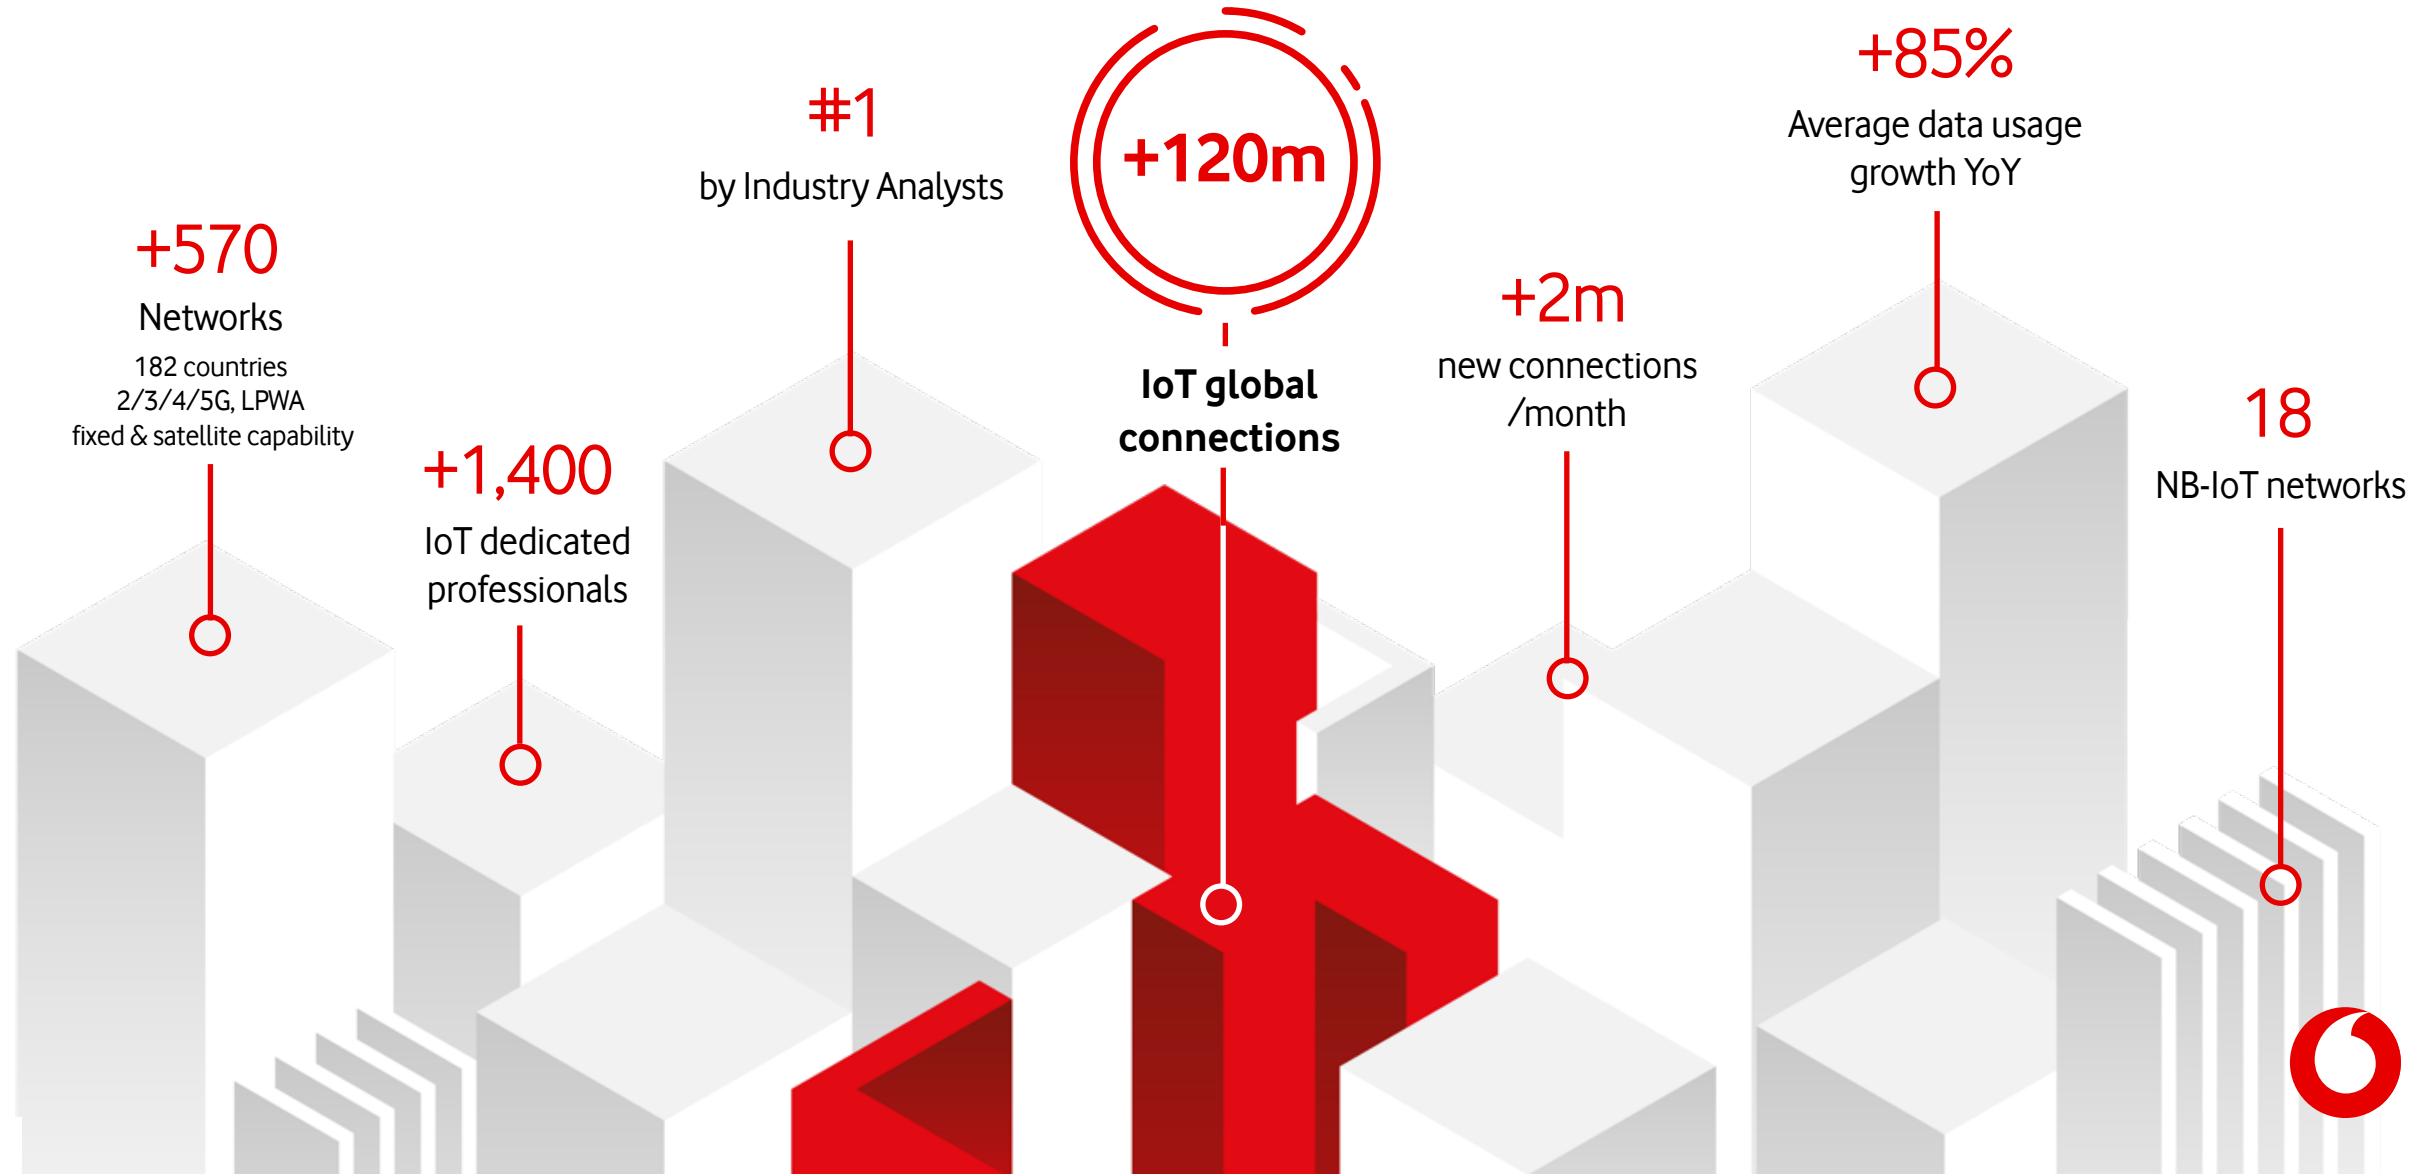

Transforming cold chain management

Ensuring Water Quality

Vodafone IoT can help Irish businesses in 3 key ways

1

Provide off-the-shelf end-to-end smart solutions

- Offering easy-to-deploy, easy-to-manage all-in-one IoT solutions to address business problems
- Pre-packaged covering all elements you need (devices, connectivity, application)

2

Industry leading IoT connectivity for your devices

- Vodafone are recognised IoT connectivity leaders with global reach
- Unlock exciting new industry use-case with 5G Mobile Private Networks (MPN)

3

Collaborate to create a custom-made IoT solution

- Industry leading partnerships, consultative capability & experience to build tailored end-to-end IoT solutions to meet your specific business goals
